PROFESSIONAL SUMMARY

Results-driven QA Automation Engineer with over 4 years of experience in designing, building, and executing robust automation frameworks. Specialized in **Java-Selenium WebDriver**, **API testing**, and **CI/CD pipeline integration**. Proven track record in improving test coverage, reducing manual QA overhead, and validating critical applications in EdTech, cybersecurity, and collaboration tool domains. Proficient in Agile/Scrum methodologies with a strong focus on delivering high-quality, zero-defect software.

CORE COMPETENCIES

Java & Selenium WebDriver	API Testing (Postman)	Performance Testing (JMeter)	CI/CD (Jenkins, GitLab CI)
BDD (Cucumber BDD)	Database Testing (PostgreSQL)	Mobile QA (Android, iOS)	Agile / Scrum / SDLC

WORK EXPERIENCE

Careers360 Feb 2026 -- Present

QA Automation Engineer | Gurugram, India

Project: College Predictor -- EdTech (Web, Android, iOS)

- Designed and executed automation test cases for core selection, registration, and payment flows to align with profile standards.
- Tested multi-exam/counselling selection flows, dynamic form fields, and dependent taxonomy dropdown logic.
- Validated Smart Registration (Mobile OTP, auto-submit, login status transitions) and end-to-end payment flows.
- Tested payment gateway integration - including successful transactions, payment failure/retry scenarios, order status updates (Not Paid, New Purchased, Recharge Purchased), and combo/companion product access post-payment.
- Validated paid status transitions and recharge pack flows across Free CP, Paid CP, and Usage Limit Reached cases.
- Conducted API testing via **Postman** for the prediction engine, form submissions, and UTM tracking endpoints.
- Executed database (DB) testing to verify usage logs, paid status, user records, and timestamp accuracy.
- Performed cross-platform testing on Web, WAP, Android & iOS, including deep-link and webview validation.
- Raised and tracked defects in **Jira**; validated UI implementation against Figma/Zeplin designs.

Radiansys Technologies Pvt. Ltd. Mar 2025 -- Feb 2026

QA Engineer | Gurugram, India

Project: Tip Tap Editor (Client: Simpplr Inc.)

- Designed, developed, and maintained automated UI test suites using **Java** and **Selenium WebDriver**, increasing test efficiency.
- Implemented and scaled the **Cucumber BDD framework** to enable behavior-driven test coverage.
- Conducted rigorous UI component validation using **Figma designs** to ensure pixel-perfect visual consistency.
- Integrated automated test execution into **Jenkins CI/CD pipelines**, enabling continuous feedback for the development team.
- Performed cross-browser compatibility testing across multiple environments to ensure consistent user experience.
- Collaborated with developers and product managers in daily stand-ups and sprint planning to refine requirements and report defect logs in **Jira**.

QA Engineer | Noida, India

Project: SEG and InDefend Advanced Server (Cybersecurity Domain)

- Developed, optimized, and maintained a robust automated testing framework using **Selenium**, **Java**, and **TestNG** for cybersecurity servers.
- Engineered and executed automated API validation scripts using **Postman** to verify REST services and endpoint reliability.
- Conducted performance, stress, and load testing using **JMeter**, successfully identifying and debugging bottlenecks under heavy loads.
- Automated database transaction validations and backend testing using **PostgreSQL**.
- Designed and executed manual test cases for critical product features, participating in risk-based defect triage.
- Integrated regression test suites into **Jenkins automation pipelines** to streamline release processes.
- Authored detailed test plans, reports, and technical documentation, and mentored junior QA team members in automated testing practices.

HighPolar Software

Nov 2019 -- Jan 2020

Software Developer Intern | Haldwani, India

- Assisted in front-end development using **JavaScript** and **Bootstrap**, improving UI responsiveness.
- Identified, tracked, and resolved front-end UI bugs to optimize website performance.
- Participated in peer code reviews and collaborated with senior software engineers.

TECHNICAL ACCOMPLISHMENTS & PROJECTS

Test Automation Framework: Developed a customized automation framework that successfully boosted test coverage by **40%** and halved manual QA testing effort by **50%**.

Performance Engineering: Initiated load testing workflows that optimized system load resilience and increased capacity by **25%**.

Security & Compliance Testing: Verified and successfully deployed high-security email features with zero post-release defects.

EDUCATION

B.Tech in Computer Science Engineering - Graphic Era Hill University, Uttarakhand

July 2016 -- August 2020

LANGUAGES

English	Professional
Hindi	Native

METHODOLOGIES & ENVIRONMENTS

Languages: Java, JavaScript (Basic), HTML, CSS, SQL, XML, JSON

Automation & Testing Tools: Selenium WebDriver, TestNG, Cucumber BDD, Maven, POM (Page Object Model), Postman, JMeter

CI/CD & Orchestration: Jenkins, GitLab CI, Apache Airflow (Basic)

Databases & Systems: PostgreSQL, MySQL, Windows, Linux, macOS, Android

Methodologies: SDLC, STLC, Agile/Scrum, Black-box & White-box Testing, Regression, Sanity, Performance & Load Testing

Project Management: Jira, GitLab, GitHub, Git
